

# 10 Ways To Improve Your Maths Mark

35% of students who take Mathematical Literacy could take Pure Mathematics and pass with 50% or higher.

## Back to Basics

$$1 + 1 = 2$$

Learn the foundations: techniques, methods and formulas.

## Positive Attitude

It's possible to become friends with maths and enjoy it!

## Keep Up

Stay up-to-date and try not to fall behind.

## Do Your Homework

It helps you to become comfortable and confident in your work.

## Ask for Help

$$2(5c + 2) - 2c = 3(2c + 3) + 7$$

$$5x + (2x - 4x) = 11$$

$$3(t + 7) - 2t = (2t - 5t) + 12t$$

$$9(3y - 8) - 6y = 2y - (3 \times 3y)$$

$$3k + 5k(15 - k) = 2k - (4 \times 5)$$

Help!

There is no shame in **asking for help** from teachers, friends or parents.

CLICK!

## Google It

Use resources like YouTube and online tutorials to help you understand the work better.

## Practise

$$2(3+1) = 8$$

$$2(3+1) = 8$$

$$2(3+1) = 8$$

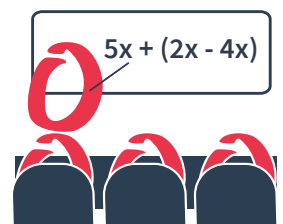

$$2(3+1) = 8$$

$$2(3+1) = 8$$

$$2(3+1) = 8$$

Practise really does make perfect when it comes to Maths.

## Extra Lessons

This will help you fully understand your work and give you extra practise.

Good Luck!

## Past Papers

Teachers test similar work each year - past papers help prepare you.

## Don't Get Despondent

Everyone does badly every now and then... Use it as **motivation** to work harder.
